

# MULTI-SOLVENT EXTRACTOR X40 MSE

**Precision**  
Extraction solutions

## STANDARD FEATURES

- Approximately 100L, 30–50 lb material capacity
- Ultra user-friendly, ergonomic design
- Drop-in stainless steel material baskets
- Swagelok tri-valve systems
- UL-21 compliant hose systems
- Rated for ethanol, butane, and propane
- Baffled jacketing on collection vessel
- Vacuum jacketing on solvent vessel with internal cooling coil
- Molecular sleeve for moisture removal from Live Resin production
- Excellent throughput for scaled hemp production
- 100% ASME stamped and rated vessels
- 4 material vessels for easy nonstop operation
- SL-12 with HST booster heaters
- 100% compression fittings
- N2 assisted extraction up to 200 PSI

## EQUIPMENT SPECIFICATIONS

<b>Footprint (Approx.)</b>	135" W x 32" D x 77" H
<b>Operational Height</b>	92"
<b>Total Weight</b>	2,150 lbs.
<b>Shipping Weight</b>	3,000 lbs (3 crates of 1,000 lbs )

**THE X40 MSE IS COMPLIANT IN ALL  
REGULATED JURISDICTIONS AND  
ENGINEER PEER REVIEWED FOR ALL  
TYPE 6 AND TYPE 7 LICENSES**

**Precision**  
Extraction solutions

SEE PAGE 2 FOR ETHANOL AND HYDROCARBON SPECIFIC DATA

# MULTI-SOLVENT EXTRACTOR X40 MSE

**Precision**  
Extraction solutions

## ETHANOL SPECIFICATIONS

- Non-volatile, EPR reviewed, closed loop, Type 6 compliant process for licensed operations (when used with ethanol solvent)
- Pressurized Aqueous Cold Ethanol Extraction (PACEE) for superior full spectrum cannabinoid and terpene removal
- 100L of ethanol used per run
- Approximate 1.5 hour processing time per run (30-50 lb single batch with recovery via a 18g/hr FFE)
- 2 hour processing time (triple batch with recovery)
- 95% + cannabinoid and terpene removal
- N2 assisted extraction up to 200 PSI
- Up to 3 runs per solvent batch
- Full spectrum yields great for high CBD hemp products

## HYDROCARBON SPECIFICATIONS

- Volatile, EPR reviewed, closed loop, Type 7 process for licensed operations (when used with hydrocarbon solvent)
- Compatible with singular and mixed hydrocarbon solvents for superior extraction capability and product production
- Approximate 45 minutes processing time per run (single material column)
- Approximate 2 hours processing time per run (quad material columns)
- Certified for Class 1, Division 1 environments
- 97% cannabinoid and terpene removal
- Minimal solvent loss per batch (less than 4% per run)
- Customized mid-scale hydrocarbon extraction for high yield product production, e.g., HTFSE, THC-a crystalline and "Sauce"
- Full spectrum yields great for high CBD hemp products
